

INSTALLING NAPA on a PC running WINDOWS 64 bits.

Choose the disk where you will place and run NAPA, (HERE DISK C:)

**** Step 0 **** (if needed)

Install 7-ZIP if you do not have it on your computer:
Run '0.msi'.

**** Step 1 ****

Unzip '1.zip' with 7-ZIP.
Unzipped directory 'Mingw64' should be moved as 'C:\Mingw64'.

**** Step 2 ****

Unzip '2.zip' with 7-ZIP, using the password you have received.
Unzipped directory 'Simulate' should be moved as 'C:\Simulate'.

**** Step 3 ****

Unzip '3.zip' with 7-ZIP, using the password you have received.
Unzipped directory 'Simulate_Examples' should be moved as 'C:\Simulate_Examples'.

**** Step 4 **** **IMPORTANT TO DO IT NOW BEFORE STEP 5 !**

In "Simulate\InstallDos, run the script 'INSTALL.bat' to indicate your given name and family name..
DO NOT enter any spaces or weird characters! Replace them by an underscore if necessary.

**** Step 5 ****

In directory 'C:\Simulate\PanelDos\Panel',
create a shortcut from 'NAPA Vineyard' and move it to your desktop.

**** Step 6 ****

Click to the icon of this shortcut, it is then preferable to
change the appearance of this directory by choosing 'large icons'.

**** Step 7 ****

In "Napa Vineyard', click on 'Editor Crimson for Napa'. Open file '\Simulate\NapaDos_Test_\test.nap'.
Press '**Alt R**'. The simulator NAPA should run. You will receive then some instructions to get a first plot.

**** Step 8 ****

It is time to read the file '\Simulate_Examples\NAPA_TEASER.pdf'.
The directory '\Simulate_Examples' contains many examples. It could be interesting to run a few of them to exercise.

**** Step 9 ****

Last but not least, send an Email with your Email address to yves.leduc@unice.fr

ENJOY !
