

INSTALLING 'NAPA' on a PC running WINDOWS 64 bits.

> Choose the disk where you will place and run NAPA, (for instance disk C:)

**** Step 1 ****

Unzip 'Simulate.zip' with 7-ZIP, using the password you have received.

Unzipped directory 'Simulate' MUST be moved as 'Simulate' on the root of the disk.

**** Step 2 **** -- IMPORTANT : DO IT NOW BEFORE STEP 3 ! --

In '.\Simulate\InstallDos', launch the script '_Install.bat' to create the shortcuts 'Napa Vineyard' and 'Napa Vineyard – Mini' on the desktop of your computer.

**** Step 3 ****

Click to the icon 'Napa Vineyard' or 'Napa Vineyard – Mini' on the desktop.

It is then preferable, although not mandatory, to change the appearance by choosing 'medium icons' or 'large icons'.

**** Step 4 **** -- TEST --

Click on 'Editor Crimson for Napa'.

Open file '\Simulate\InstallDos\TEST\test.nap'. Press 'Alt R' to start a simulation.

The simulator NAPA should run.

You will receive then some instructions to get a first plot.

**** Step 5 ****

It is time to read the file '\Simulate\NapaDos\Doc\NAPA_TEASER.pdf'.

It can be accessed from the 'Napa Vineyard' panel.

**** Step 6 ****

Last but not least, send your Email address to yves.leduc@borogoves.eu

You will be informed as soon as a new release is available or if a bug has been discovered. The author will be pleased to answer to your questions.

ENJOY !
