

# SARC ERROR

*Can I help ???*

**input interpolation**

**order**  
**step**

$$\Phi = e^{Ah}$$

*choose finer calculation method*  
( may be jeopardized by **poles** configuration )

**Euler**

$$e^{ix} = \cos x + i \sin x$$

**complex** number

**floating** number

*bits  
digits<sub>10</sub>\*  
exponent*

IEEE STANDARD 754

**float**  
32  
6  
 $\approx \pm 38$

**double**  
64  
15  
 $\approx \pm 308$

**long double**  
80  
18  
 $\approx \pm 4932$

**float128**  
or quad

128  
33  
 $\approx \pm 4932$

*x87 standard*

\* number of base-10 digits that can be represented without change
